

Please be aware that not all road junctions are shown as there would be far too many tulips. The ones shown are where there is a turn required or where the required direction is not obvious. If you get to a junction without a tulip continue on the same road.

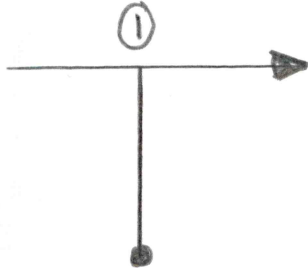

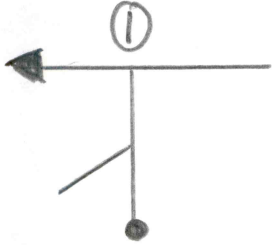

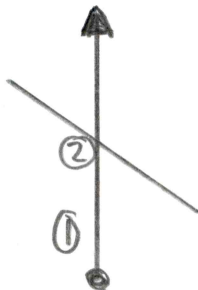

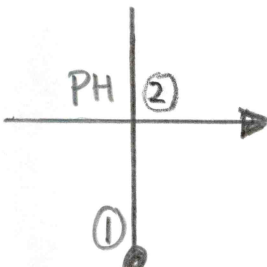

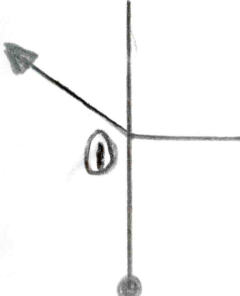

The distances between each tulip have been checked and are accurate.

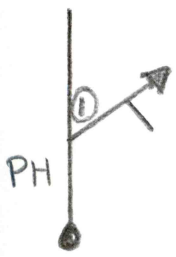

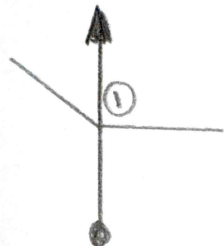

The road sign information given only relates to the required direction of travel.

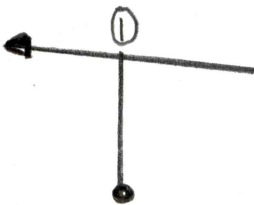

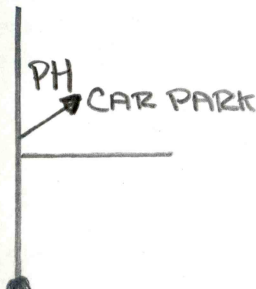

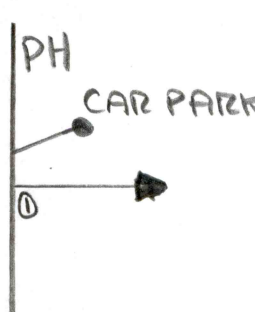

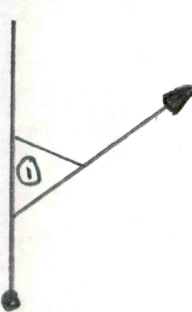

The location of each road sign in relation to the junction is shown as accurately as possible.
